Rescue Stretchers
Catalogue

Code: cmc752001
Product: Basic Rescue System

Made from heavy-duty sheet of plastic, the stretcher becomes rigid when folded around the patient. Stretcher can be transported by carrying, lifting horizontally or vertically by rope or helicopter, or can be towed. The system comes complete with backpack, towing harness, two straps, horizontal and vertical lift sling, one large steel carabiner, and four removable web handles. Size: Folded dimensions - 90cm x 22.5cm. Weight – 8.2kgs.

Code: thermstr
Product: Thermo Rescue Stretcher

The Traverse Thermo Rescue Stretcher is not only purpose-built and engineered for water, confined space, high angle and other rescues, but it also provides life-saving Thermo protection. Thermo Technology provides safe, reliable, active heat to your patient immediately. Powered from either a 12V or 24V system, the stretcher can provide controlled heat to the patient (to a maximum of 102.20F/390C) from a vehicle, as well as from a portable battery pack. The Traverse Thermo Rescue Stretcher rolls up for ease of handling and storage. After deployment, the stretcher becomes so rigid, it can eliminate the need for spinal immobilizing devices.

Code: FWE1402
Product: Aeromedical Litter Single Fold

Description: A single fold stretcher that has the necessary features to provide reliable and efficient patient transportation, whether it’s a fixed wing service, a helicopter program, or a combination of both. The adjustable backrest enables the attendants to place the patient in the most comfortable position during transport. Square-end frame is commonly incorporated into the head end of the litter, allowing broad access to the main frame for easy lifting and to accommodate a wide range of backboards and the Ferno Scoop Stretcher. Heavy-duty rollers can be ordered for easy on-and-off loading. Rollers reduce the amount of lifting required by the attendants. 360 degree spherical casters made of stainless steel enable easy maneuvering in all directions. Size: L 183cm, W 46cm, H 11cm, Weight 11kg, Load Capacity 159kg

Code: FWE1403
Product: Aeromedical Litter–Double Fold

Description: Whether it’s a fixed wing service, a helicopter program or a combination of both, the FWE1403 has the features necessary to provide reliable and efficient patient transportation. It is constructed of durable lightweight aluminum, has a multi-adjustable backrest and can be customized using square or tapered ends, fastening pins, underside rollers or 360 degree casters. Pad and restraints are optional. Size: L 184cm, W 46cm, H 11cm, Weight 11kg, Load capacity 159kg
Code: **FWE71**  
Product: **Basket Stretcher**  
Description: No other stretcher performs like a Ferno Basket Stretcher during your most difficult rescue operations. Unlike conventional Wire Basket Stretchers, it is virtually penetration-proof. Molded-in runners and handholds make the stretcher easy to handle, even over rough terrain. Size: L 216cm, W 61cm, H 19cm, Weight 12kg, Load Capacity 272kg

Code: **FWETBG**  
Product: **Basket Stretcher Titan Gazelle Tapered Steel**  
Description: The tubular runner-rails give the Gazelle stretcher a distinct advantage over other low-cost basket stretchers that normally use flat-bar, as tube gives significant increase in strength, reducing bent frames and giving a longer service-life. Durathene netting offers greater safety and comfort to both patient and rescuer. Netting is easily replaced. Patient restraints utilise an ultra-strong connection system that are easy to use in any environment and feature a breakaway pull-tab for simple operation. Size: L.210cm W.62cm D.18cm

Code: **FWETBT**  
Product: **Basket Stretcher Titan S/S Tapered**  
Designed with the bends placed in strategic locations for easier handling and maneuverability especially in tight places, this stretcher features: ergonomically superior 1" top tube, molded back support, stainless steel construction, durathene netting and exceeds the 2500lb. load test.

Code: **FWETTB-SP**  
Product: **Basket Stretcher Titan Tapered - Split**  
The Titan Split Tapered Basket features the strongest, most efficient connection system available today. Complete assembly of the stretcher requires less than 10 seconds. The stretcher comes standard with four patient restraints and black Durathene netting and is constructed of stainless steel tube. Size: L. 212cm W. 60cm D. 18cm Weight 16kg

Code: **FWE71S**  
Product: **Basket Stretcher Two-Piece**  
Model 71S Two Piece Basket Stretcher separates for compact storage or backpacking to a rescue site. A heavy-duty aluminium frame supports a high-density polyethylene shell. Stretcher halves store nested together. The basket stretcher is assembled and secured with pins. Size: L 217cm, W 61cm, H 20cm, Weight 12kg, Load Limit 272kg
**Code: FWE2060**  
**Product: Ferno Res-Q-Mate**

Description: Ferno’s new ResQ-Mate Rescue Stretcher is specifically designed for use in tight places including building collapses, mine rescue, quarry accidents and confined space rescue. Constructed of quality synthetic materials and stainless steel, the Res-Q-Mate is also resistant to rot and corrosion, so it’s unaffected by long-term storage. Quickly adjustable color coded straps secure the chest, thighs and lower legs. The Res-Q-Mate is impervious to oil, water, grease and other petroleum products. Dimensions: Folded & Packed (100cm x 28 x 18cm) Deployed (185cm x 28cm) Weight: 17.6kg Load limit: 180kg

**Code: FWE1411**  
**Product: Rescue Paraguard Stretcher**

Description: The Paraguard Rescue Stretcher is designed for a variety of specialized rescue situations. Because of its compact size, quick application time and versatility, the Paraguard is ideal for rescue operations in structural building collapse, trench cave-in, quarry accidents and confined space rescues. Size: L 183cm, W 28cm, H 10cm, Weight 16.6kg, Load limit 181kg

**Code: FWENR**  
**Product: Rescue Stretcher Neil Robertson**

Description: A widely used stretcher for recovery of patients under difficult circumstances. Durable cotton exterior resists decay. Ramin slats provide full length body support. Natural fibre manilla, used for support ropes, resists effects of chafing against rough surfaces. Stretcher includes head restraint, carrying handles, upper abdomen straps and leg straps. Size: L 150cm, W 100cm, D 18cm Weight 8kg

**Code: FWELS**  
**Product: Ferno Lifesaver Stretcher**

Description: The Ferno LifeSaver Stretcher is a modern version of the traditional Neil Robertson stretcher used by cave rescue teams to provide patient care and transport in constricted passageways. The LifeSaver is designed to provide quick, easy use in horizontal and vertical life situations where minimum bulk is a consideration. The compact, roll up design also makes transporting the stretcher easy. The LifeSaver uses full-length 5 mm ribs interwoven by tough 1000 denier, high tenacity nylon fabric to provide full body splinting in a very narrow patient package. Comes complete with 5 built-in patient restraints with forged steel buckles. Stainless steel rings are used at the foot and head. Made in Australia. Dimensions folded: 60 x 6 x 5 in. (1530 x 150 x 1000 mm) Dimensions flat: 60 x 40 in. (1530 x 1000 mm) Weight: 11 lbs. (5 kg)
